

# Project Details

<http://195.231.33.219/diamond/default.aspx>

My panel will have to have these same features and more The additional modalities are:

A section to give jewelers the opportunity to access our software with all product images but they have the possibility to change the logo and insert that of their company.

This service the customer will pay one-time monthly of (example €20 per month)

So there will be a super administrative panel for me and other small panels for merchants

In this CRM that I sent you there is an option that from a button I can change the price of all the products that are inside based on the selling price of the gold

Project overview: this CRM system will manage master data, the generation of

Receipts, monitoring customer payments and managing invoices, customized for

A diamond company. The system will manage specific categories of jewelry, such as sieves, quality,

Colors and large stones, ensuring the monitoring and detailed management of all the

Relevant data.

1: Management of personal data:

- Configure the modules to manage the following data: o Customers

Final results:

- Configuration of the master data database.
- User interfaces for managing and displaying categorized data.
- Role-based access controls for users.

2: Management of receipts and payments:

Final results:

Suppliers

Users

Sieves (for diamond size classification)

Quality (diamond purity and grade) or Colors

Big stones

Rules on jeweler

Type of jewelry

Implement receipt and payment management:

Create receipts (specific for sales and diamond deposits)

Customer balance and payment tracking

Deposit receipts

Information on jewelry (details on specific diamonds and frames)

Real-time balance monitoring.

Creation of receipts for deposits and transactions.

Forms for the management of payments with appropriate accounting entries.

Management of invoices and accounts:

This is the price table and from here I will manually change the prices every day and automatically you will have to change it on all products
